

SISTEMI PER TENUTA

Guarnizioni per sistemi oleodinamici
Seals for hydraulic systems

DISTRIBUTORE AUTORIZZATO
ASTON SEALS spa

SIXTEN è nata nel 1990 con un'idea ben definita, caratterizzata da una marcata specializzazione nel settore dei sistemi di tenuta compatibili con i fluidi oleodinamici, chimici e pneumatici sia per "aria calda che fredda".

Da allora progettiamo e commercializziamo esclusivamente guarnizioni perfettamente idonee all'impiego richiesto grazie ad una professionalità certificata anche dal sistema di gestione per la Qualità conforme alla norma ISO 9001:2015 nr 9190.SIXT rilasciato da CISQ/IMQ-CSQ.

L'arte di offrire soluzioni per ogni esigenza proviene da un ineccepibile servizio, per cui dinanzi alle continue evoluzioni tecnologiche dei produttori di guarnizioni, abbiamo accuratamente selezionato partner tra le migliori performance di qualità ed affidabilità, da qui la scelta per AS ASTON SEALS.

***SIXTEN** was born in 1990 with a clear and strong goal, defined by a precise specialization within the sealing system addressed to hydraulic, chemical or pneumatic fluids, both for "hot and cold air".*

Since then, we exclusively design and sell seals completely suitable for what they are required for, thanks to a high standard professionalism, also recognized by the management system addressed to the Quality compliant ISO 9001:2015 nr. 9190.SIXT issued by CISQ/IMQ-CSQ.

The art of delivering solutions for every need derives from a flawless service; according to a constant changing within the sealing production market, Sixten has always carefully selected its partners due to their performances and reliability. This is the reason why AS ASTON SEALS has been chosen.

AS ASTON SEALS nasce nel gennaio 2000 e progetta, produce e distribuisce guarnizioni, raschiatori, guide per cilindri oleodinamici e pneumatici tutto di estrema qualità, frutto di un team competente ed ambizioso che da una grossa multinazionale ha voluto rendersi indipendente nel settore.

L'intensa collaborazione e l'esperienza maturata negli anni ci ha portato ad un legame che oggi consideriamo indispensabile per tutti gli innumerevoli progetti ed applicazioni che sono stati condivisi e personalizzati grazie al giusto rapporto di fiducia reciproco.

Oggi AS ASTON SEALS è un'azienda conosciuta ed affermata a livello mondiale presso tutti gli utilizzatori dei sistemi di tenuta, un marchio premiato per cui le direzioni commerciali di SIXTEN ed AS ASTON SEALS sono orgogliose del lavoro svolto insieme, ed è con onore che ci presentiamo come DISTRIBUTORE AUTORIZZATO dei loro prodotti, qui di seguito suddivisi per profili corredati con le relative caratteristiche e tipologie di impiego, tutti facilmente reperibili presso la ns. sede.

AS ASTON SEALS was born in January 2000 and it has been designing, manufacturing and delivering seals, wipers, guides for oleodynamic/hydraulic cylinders and tires al of the highest quality. It is the result of a competent and ambitious team which wanted to become independent in the sector starting from a famous multinational company.

The deep cooperation and experience developed over the past years marked the birth of a bond today considered essential for all the numerous projects and applications delivered and realized thanks to this mutual trust relationship. Nowadays, AS ASTON SEALS is a leader company, worldwide renown among sealing systems customers and a rewarded brand which lead both SIXTEN and AS ASTON SEALS to be proud of all the work done together. Thus, we are proud to present ourselves as a licensed distributor of their products. The following catalogue will show them divided into their profiles, equipped with their features and uses and customers will easily find them at our company headquarter.

Quali sono i must-know quando si progetta una tenuta?

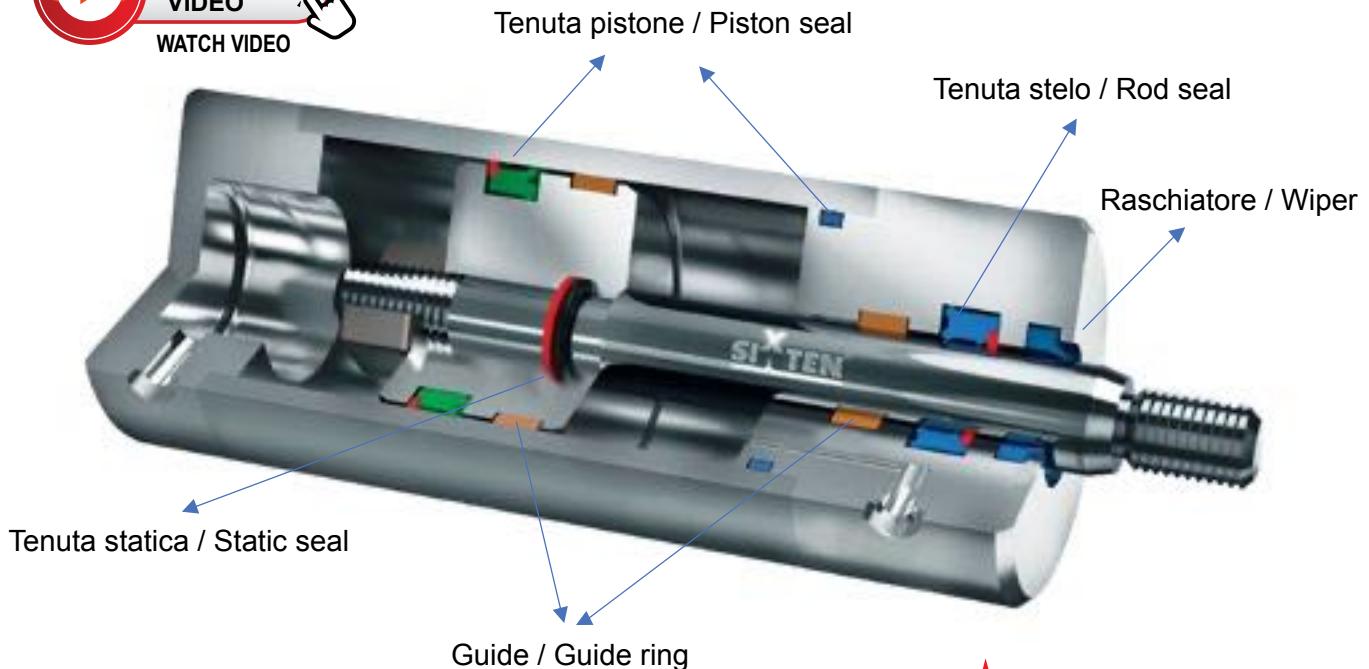

What do you need to know when designing seals?

- 1) A quale pressione deve resistere la tenuta?
What is the pressure must the seal withstand?
- 2) Quali tipi di movimento e velocità influenzano la guarnizione?
Which kinds of motion and speed can affect the seal?
- 3) A che temperatura è esposta la tenuta?
At what temperature is the seal exposed to?
- 4) Che rugosità è presente nelle parti metalliche dove lavora la tenuta?
What degree of roughness metal parts where the seal works need to have?
- 5) Che tipo d'olio viene utilizzato nel cilindro?
What kind of oil has to be used in the cylinder?
- 6) Quali lubrificanti vengono utilizzati in fase di montaggio?*
Which types of lubricants need to be used during the assembly work?*
- 7) Viene eseguita una pulizia, con quale prodotto?
What kind of product has to be used, if a cleaning is performed?
- 8) Che profilo geometrico è necessario?
What type of a geometric profile is needed?

*Consigliamo il Grasso Tipo 4 / We recommend fat type 4
Fat type 4 is recommended. Download the info here.

Please contact us for a customized compound.

La produzione di semilavorati di alta qualità per la produzione di guarnizioni tornite è una competenza fondamentale di SIXTEN. La moderna tecnologia di produzione offre a SIXTEN una copertura ottimale di una vasta gamma di applicazioni di tenuta.

Ogni prodotto semilavorato è sottoposto a un rigoroso controllo di qualità.

In Sixten sono presenti due SML500e nel nuovo reparto dedicato alla produzione. Siamo certificati per la progettazione secondo le normative ISO 9001:2015.

The high quality semi-finished products manufacturing for lathed seals represents SIXTEN core expertise. Modern manufacturing technology allows SIXTEN to get a wide range of sealing applications. Each semi-finished product undergoes a strict quality control.

In the brand new production department SIXTEN hosts two SML500e. We are certified for designing in accordance to ISO 9001:2015.

LA NOSTRA QUALITÀ

OUR QUALITY

TERMOPLASTICHE - I compound termoplastici e fluorurati, nonché le tenute speciali e precaricate, completano la panoramica dei materiali di Sixten.

THERMOPLASTICS - Thermoplastic and fluorinated compounds, as well as special and preloaded seals, complete the Sixtren materials overview.
